

NBER Online Working Papers Test Document

This is the PDF version of <http://www.nber.org/papers/w0000.pdf>.

If you can read this document your IP address, domain name or login id is in our authorization database, and you will be offered free full-text downloads for any working paper for which we have an electronic version. This should cover all papers since November of 1994, and a few others.

If you can read this, but have trouble with the working papers themselves, the most likely cause is the large size of many of the papers, up to several megabytes.

If you have difficulty printing this document, and you can otherwise print from your browser, there are several possibilities. The most likely is that you are trying to use the browser print button instead of the Adobe print button. Only the latter will work for a PDF file such as this.

More information is available from <http://www.nber.org/wwphelp.html>.
